Support public buyers in procuring AI-enabled solutions that are trustworthy, fair and secure.

28 members

Circular and Fair ICT Pact

CFIT brings together public and private ICT procurers and governments in a collective movement.

10 members

Central Purchasing Bodies (CPB) Network

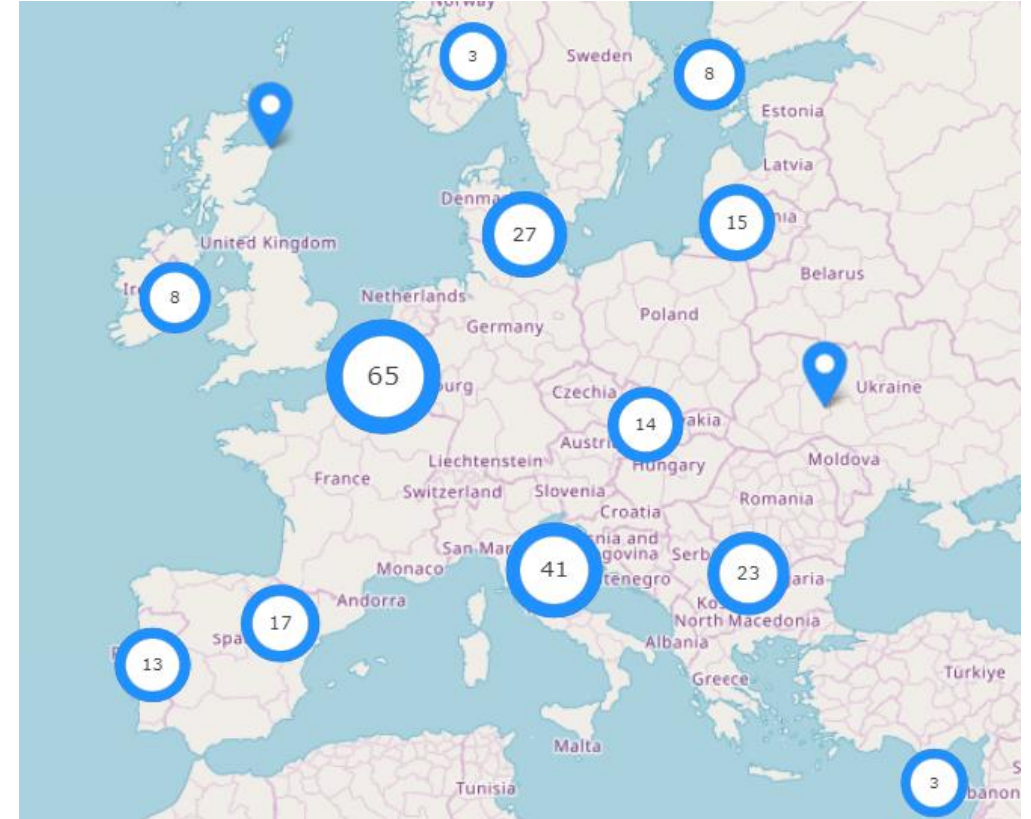

The CPB Network is a European network of national CPBs operating within and outside of the EU.

10 members

Community of Public Buyers for Sustainable Solar PV

Improving quality, sustainability and financial returns on photovoltaic (PV) projects.

Objective of Procurement of AI CoP

Support public buyers in procuring AI-enabled solutions that are trustworthy, fair and secure

Goals and Objectives

- The work is linked to building public algorithm [registers](#) by the [Living in EU](#) movement
- The information requested in [the contractual clauses](#) should be declared in a standardised format to support interoperable and automated exchange.

Development of EU model AI clauses by CoP

April 2023 - [Draft EU AI contractual clauses](#)

- Building upon the work of the City of Amsterdam and Helsinki
- Aligned with the upcoming AI Act
- Drafted by Jeroen Naves / Pels Rijcken (Dutch Law Firm)
- A high Risk Version and a Non high Risk Version

Development of EU model AI clauses

June 2023 - Two Round Tables led by Living in EU and Pels Rijcken

- To peer review both (high risk and non high risk) draft clauses
- More than 40 experts from different background participated
- Useful feedback received

Development of EU model AI clauses

October 2023 - New Version available and translated in All EU languages

You can find them here in the CoP:

[EU model contractual AI clauses to pilot in procurements of AI | Public Buyers Community \(europa.eu\)](#)

TODAY:

Objective of the session is to discuss in the context of the CoP:

- The value of the [EU model Contractual clauses for the procurement of AI](#) in helping public authorities to procure AI from suppliers that is trustworthy, fair and secure
- the value of the [EU model Contractual clauses for the procurement of AI](#) in helping contracting authorities and suppliers with the compliancy of the upcoming AI Act in their contract practice

Next Steps of the CoP: Piloting the Clauses in real projects

- From Theory to Practice
- you are kindly invited to share your initiative on the [Public Sector Tech Watch](#) - a knowledge hub managed by the European Commission
- Soon to come: Self – Report Tool
- You can use [Discussion Area](#) of the [Community of practice on the Procurement of AI](#) for further questions or interactions on the availability of the EU model contractual clauses.
