The ADR Forum is a premier annual event organised by the AI, Data and Robotics Association (Adra) in collaboration with the European Commission that brings together leading experts, innovators, policymakers, and enthusiasts from the AI, Data, and Robotics community. Our mission is to shape the future of these transformative technologies, fostering an inclusive and collaborative environment that drives responsible innovation and societal impact.

Exploring European Generative AI: shaping society and innovation

With a focus on European Generative AI, our forum aims to explore the potential and implications of this cutting-edge technology within our diverse society. Through visionary keynotes, thought-provoking panels, and engaging discussions, we delve into the latest advancements, challenges, and opportunities in the ADR domain.

Collaborative convergence: fostering inclusivity in the ADR Forum

As a multi-stakeholder gathering, the ADR Forum provides a platform for cross-disciplinary and cross-community convergence, fostering collaboration between academia, industry, and policymakers. By bridging these diverse perspectives, we aim to define and contribute to the update and implementation of the Strategic Research, Innovation, and Deployment Agenda.

The ADRF is being co-organised by Adra, Adra-e and the European Commission.

It will be hosted by Inria at its headquarters close to the historical center of Versailles.

Location: Domaine de Voluceau, 78150 Le Chesnay-Rocquencourt, France.
